Digital Literacy Awareness Infographic

Name – Pulkit Agrawal

Reg Number – 25MIP10075

I created my infographic using Canva, a userfriendly online design platform. The infographic presents key concepts of digital literacy, including what digital literacy is, useful digital tools for students, safe internet practices, and email etiquette. I designed the layout to be visually clear and engaging, using icons, headings, and short points to make the information easy to understand.

The infographic explains digital literacy as the ability to use technology effectively and responsibly. It also highlights important tools such as learning apps and communication platforms that students can use in their studies. Additionally, it includes essential safe internet practices like protecting personal information and avoiding suspicious links. The section on email etiquette provides guidelines for writing professional emails.

One interesting aspect of this task was exploring different design elements in Canva to make the infographic attractive and informative. However, I found it slightly challenging to organize all the information in a limited space while keeping the design neat and readable. Overall, this activity helped me better understand digital literacy and improved my creativity and design skills.
