Student Digital Portfolio

Name – Pulkit Agrawal

Reg Number – 25MIP10075

For this task, I created and updated my digital portfolio using three platforms: LinkedIn, Kaggle and Stackoverflow Each platform serves a different purpose in building my professional online presence.

LinkedIn is a professional networking platform where I updated my education details, including my degree, institution, and expected graduation year. It will help me connect with professionals, recruiters, and explore internship opportunities.

Kaggle is a platform focused on data science and machine learning. I plan to use it to learn from datasets, participate in competitions, and improve my analytical skills.

Stack Overflow is a platform where programmers ask and answer questions. I plan to use it to learn from real-world problems, improve my coding knowledge, and contribute by helping others when I gain more experience.

Over the next four years, I will continue to update these platforms with my projects, skills, and achievements. This task helped me understand how important it is to build and maintain a strong and professional digital portfolio.
